TOP LARGE POST – HONORABLE MENTION – 2010
 TOP LARGE POST – 2006
 DISTINGUISHED POST – 2011

PROGRAM: SUSTAINABILITY
 Sue Macomber, LEED, AP, EMIT

This presentation is meant to provide a broad overview of planning for long term sustainability solutions. Innovative solutions should approach the problem from a systems perspective and ensure integrated project initiation, design and long term operational efficiency, while accounting for the triple bottom line: social, economic, environment.

Speaker Bio

Sue Macomber is the Sustainability Specialist for GSA Region 7. Her key role is to implement the sustainability requirements within GSA Region 7 and to support the sustainability goals within the Tenant Federal Agencies. Her responsibilities include ensuring sustainability goals are being met in all aspects of GSA operations including capital projects, repair and alterations projects, building operations and business line operations throughout the Public Building Service (PBS). Sue began her career at the GSA in March 2010 as a Project Manager for the ARRA funded Energy Savings Performance Contracts (ESPCs), in the New Orleans Service Center and came on board permanently in the Fort Worth Regional Office in October 2010. Sue holds a Bachelor of Science in Civil Engineering with an environmental emphasis from the University of Illinois at Chicago.

SAME 2012 Small Business Conference (SBC) for DOD Engineering, Construction and Environmental Programs, taking place Dec. 10-12, 2012, at the Gaylord Texan Resort & Convention Center, Grapevine, Texas.

This unique conference is designed to promote partnerships and contract opportunities between small businesses and Department of Defense (DOD) agencies as well as networking opportunities between small and large businesses. SAME is proud to bring together high-ranking representatives from the U.S. Army, U.S. Air Force and U.S. Navy who all share a common goal of helping small businesses succeed in the DOD market.

This year's Small Business Conference presents unparalleled opportunities to network with USACE, NAVFAC and Air Force leaders and representatives from nearly 200 companies in the Exhibit Hall. Exhibiting companies have a company profile in the printed program that provides valuable information on their business capabilities. For the Army, Air Force and NAVFAC, contact information for leading authorities in the contracting, program and small business fields along with their photos are included. Thus, the Exhibit Hall serves as a foundation to pursue federal work and the Conference Program serves as a resource tool to keep partnering efforts alive and well long after the close of this conference.

MEETING DETAILS
 October 1, 2012

RSVP by September 26

TIME:

- 10:30 a.m. Board Meeting
- 11:30 a.m. Registration
- 12:30 p.m. Lunch and Program

LOCATION:

“777 Main” (Formerly Carter & Burgess)
 Petroleum Club | 40th Floor
 777 Main Street | Fort Worth, Texas

COST:

- \$25.00 Full Buffet
- \$20.00 Young Members

PARKING:

- \$2.50 On-Site Parking
 (with validation)

RESERVATIONS:

Angie McCullough | 817.284.9400
AMcCullough@CMJengr.com

Please remember the guidelines regarding reservations. If you make a reservation, you are required to pay for your meal.

SAME Fort Worth Post is now on Facebook!

Society of American Military Engineers – Fort Worth Post

JB West of the Fort Worth Post SAME participates in an annual classic car show at the Wounded Warrior Center at Brook Army Medical Center in San Antonio, TX. The photo (left) shows one of the wounded warriors and his son sitting in J B West 55 Pontiac during 2011 annual car show.

Another show is scheduled for October 2012. If you are interested in either attending or making a donation to the Wounded Warrior Center at Brook Army Medical Center contact J.B. West at Warwagon16@gmail.com

SAME FORT WORTH POST GOLF TOURNAMENT

Date: October 5, 2012
 Location: Iron Horse
 6200 Skylark Circle
 North Richland Hills, TX 76180
 Time: Registration – 7:15 am
 Shotgun Start – 8:00 am
 Lunch and Awards – 12:30 – 2:30

As Sustaining Member firms, you're being contacted first for Hole and Prize Sponsorships. If you have any questions, please contact Angie McCullough at amccullough@cmjengr.com

We look forward to seeing you all out there!

2012 TEXOMA-MISSOURI RIVER JOINT ENGINEER TRAINING SYMPOSIUM (JETS) San Antonio, Texas

The website and registration is open for our JETS (the new title for Regional Conferences) in Oct 2012 being hosted by the San Antonio Post at Crowne Plaza Hotel San Antonio – Riverwalk.

Crowne Plaza Hotel San Antonio – Riverwalk

MULTATECH is a full-service, veteran and minority-owned architectural and engineering firm with offices in Fort Worth and Dallas, Texas. Established in 1986, MULTATECH has grown from a one-person office to 79 professionals today. During this time, MULTATECH has evolved from offering mechanical, electrical and plumbing (MEP) engineering to providing full-service architectural design, MEP, civil, and structural engineering and construction management services.

MULTATECH's licensed and LEED Accredited Professionals provide A/E services for projects ranging from military, municipal, aviation and railroad infrastructure to commercial, retail, healthcare and educational institutions. An exemplary reputation of delivering quality design services while adhering to budget and schedule has enticed a variety of clients to continually return to MULTATECH for architectural and engineering services. With multi-discipline teams and dedicated Project Managers, we are focused and committed to supplying exceptional, responsive client services.

MULTATECH is proud to support our military forces through traditional design-bid-build and design/build projects at military facilities throughout the country and overseas. Our federal and military experience includes barracks, commissaries, training facilities, munitions storage, airstrips and overseas base camps. Recent clients in the Dallas-Fort Worth area include the U.S. Army Corp of Engineers, NAVFAC and DynCorp International. With several members of our staff previously having served in engineering roles on active duty in Iraq and Afghanistan, we provide a unique skill set and possess distinctive experience in contingency design and construction.

MULTATECH currently holds an Indefinite Delivery/Indefinite Quantity (IDIQ) for Sustainment, Repair and Modernization (SRM) with the Texas Adjutant General's Office for a multitude of design and construction supervision projects across the state.

For more information about MULTATECH, contact Paul Padilla, P.E., Vice President, at 817.289.2060 or ppadilla@multatech.com

Sundt is the 58th largest contractor in the United States. It provides a variety of construction services for clients across the country. The 100 percent employee-owned company constructs projects of many types for both private and public owners, including buildings of various types; heavy civil projects such as highways, bridges and airport facilities; mining and industrial facilities; and various projects for the Department of Defense and other federal agencies. The company performs portions of the work with its own crews.

Sundt has been a leader of industry innovations, such as Building Information Modeling, or BIM, and ROCK technology. ROCK stands for Remote Office Construction Kit, and is essentially a tablet PC built for rugged environments that allows construction crews to bring all plans and important documentation into the field.

The company has demonstrated its dedication to sustainability by encouraging employees to become LEED Accredited. (LEED stands for Leadership in Energy and Environmental Design.) As a result, the company currently has 175 LEED Accredited Professionals.

Sundt's commitments to industry leadership, as well as its philanthropic activities through the Sundt Foundation, are important values that set the company apart from its competitors. The Foundation has made almost \$5 million in grants to non-profit organizations in the cities and military installations where Sundt has an active office or project.

Sundt has been a Texas contractor for more than 40 years, with offices currently in San Antonio and El Paso. The company has completed extensive work at Fort Bliss, Fort Sam Houston and Fort Hood and is currently working on the Fort Worth 7th Street Bridge.

Founded in 2001, TEAM Integrated Engineering, Inc. (TEAM) utilizes the specialized environmental, engineering, and medical logistics expertise of our people to solve our clients' most difficult problems. TEAM is headquartered in San Antonio, Texas, "Military City USA," with professionals providing expertise to clients worldwide.

Our team of professionals provides advisory and assistance services and architectural and engineering services to government agencies and commercial clients nationally and internationally; to include remote locations and combat zones. TEAM's experience encompasses an abundance of diverse projects often requiring specialized qualifications, clearances, certifications, and licenses.

A few notable projects include:

Reutilizing hazardous materials at the Speicher Hazardous Waste Treatment Center in Iraq, resulting in the reuse of 400 drums containing expired shelf life grease. This allowed for a more environmentally responsible disposition of the grease, as well as saved thousands of dollars for the Department of Defense. These drums were also recognized as being a vital resource for the Responsible Drawdown of Forces in Iraq.

Providing the professional team to successfully establish the Battlefield Health and Trauma Research Institute (BHT) at Fort Sam Houston, to include all the Initial Outfitting of the new building (over \$10M in new medical equipment), as well as relocating over 1000 pieces of medical equipment belonging to the Joint Dental Research Laboratories from Great Lakes, IL to BHT. This project was completed on time and \$672,037 under budget. Additionally, over 600 items, valued at over \$250,000 total, from the Joint Dental Research Laboratories were turned into the Defense Reutilization and Marketing Office for repurposing.

Coordinating with officials and contractors at Keesler Air Force Base on repair efforts of all identified housing units, to include leading all phases of design reviews. TEAM implemented, in-house, a web-based, secure design review platform that required no new software. This allowed the government to provide comments on 1,067 units, over 36 floor plans, and all associated site plans, with only a five day turnaround.

To ensure that comprehensive solutions are delivered to our clients, TEAM partners with outstanding large and small businesses. By utilizing companies that are innovative and the best in their field, we can continue to maintain a competitive edge, saving our clients money and mitigating risks.

Integrity, quality, diversity, and expertise are core to TEAM's record of excellence over the past eleven years. For more information, contact Megan Crimmins at 210.341.4316, mcrimmins@TEAM-IE.com, and visit us on the web at www.TEAM-IE.com.

TETRA TECH

With more than 13,000 associates in over 330 offices worldwide, Tetra Tech is a leading provider of consulting, engineering, and technical services worldwide. In a complex world with competing demands for limited resources, Tetra Tech offers clear solutions made possible with sound science, understanding, innovation, and industry-leading approaches.

Our Engineering & Consulting Services group provides science, consulting, engineering and project management services for water resources, groundwater, watershed management, mining, geotechnical, environmental management, and information technology projects.

The Technical Support Services group provides consulting services to support international development, climate change and environmental programs, energy management, disaster management and emergency response and, staff augmentation/facilities management projects.

Tetra Tech's Engineering and Architecture Services group provides engineering, architecture, interior and exterior design, and program administration services for water and wastewater facilities, land development projects, and transportation infrastructure.

The Remediation and Construction Management group provides program management and construction services, including design-build and design-bid-build services, for environmental remediation, infrastructure, heavy civil, military transformation, ports and harbors, energy, and communications projects.

DOD is one of Tetra Tech's largest customers, with services provided at multiple, geographically dispersed CONUS/OCONUS locations.

For additional information on Tetra Tech's capabilities, please contact Mark Matranga at 832.251.6024 or by e-mail at mark.matranga@tetrattech.com.

The Beck Group (Beck) is a third-generation, family-owned company founded in 1912 as a general contractor. After nearly a century in the AEC industry, we have evolved into a full-service builder with international reach. More than 500 designers, construction managers, engineers, real estate agents, technology developers and highly seasoned corporate and field staff contribute to our reputation. Since 2004 we have put in place more than \$4.11 billion worth of built space in the government, education, healthcare, religious, corporate office, and mixed-use industries.

A few of our current federal projects include:

- CDC Office Building, Atlanta, Georgia – Design Build, 268, 592 SF ground-up office building
- GSA Hipolito Garcia Post Office and U.S. Courthouse San Antonio, Texas –256,000 SF Historic renovation located across from the Alamo
- GSA Wayne Aspinall Historic Restoration, Grand Junction, Colorado – Design Build, 42,000 SF historic restoration and proposed Net Zero Energy building
- GSA HUD Headquarters Renovation, Washington, D.C. – Design Build, 25,000 SF demonstration space within the HUD office space
- USACE 100 Man Dormitory, San Angelo, Texas – New construction at Goodfellow AFB
- Federal Law Enforcement Training Center, Glynco, GA – Department of Homeland Security warehouse conversion to administrative space.
- 8(a) Mentor Protégé MATOC's include:
 - Texas Air National Guard
 - Oklahoma National Guard
 - USACE Region 6 Medical Facilities
 - Georgia Construction

The Beck team is made up of over 500 employees working in offices in Atlanta, GA, Austin, TX, Dallas, TX (headquarters), Denver, CO, Fort Worth, TX, Mexico City, Sao Paulo, San Antonio, TX and Tampa, FL.

At Beck, we're proud of our reputation and proud of our award winning projects and work practices. We're proud of the work we've done and the more than 450 construction and design awards we've received. The American Institute of Architects' Dallas chapter distinguished Beck as the first company to be named both Architecture Firm and Contractor of the Year in 2003. We're proud to have been included in Fortune magazine's "Top 100 Companies to Work For." We're proud to proclaim to our clients (85 percent of whom are repeat) that we bring them not only industry expertise, but collaboration, passion, trustworthiness, innovation, a proactive mindset, and fun. We ceaselessly seek to portray our clients as enlightened leaders who value lasting relationships and achieve superior results.
